## More Information 💙

Details

The 2U full length rack will include 4 of the latest SPECTRAN V6 receivers, the latest AMD Epyc processor with 64/128 cores (single or dual processor version), 2 TB of high speed memory and lots of ultra fast SSDs for massive IQ recording and a dual 100GbE for maximum data throughput to the outside world.

As an option we will offer an extra super fast 1U SSD storage monster rack with 512 TB or 1 PB (1000 TB) with dual 100 GbE.

Our RTSA-Suite PRO software will fully support the SPECTRAN V6 ENTERPRISE incl. massive real-time receiver stitching and full remote control and data transfer down to IQ level.
